

TWO INGREDIENT MOON DOUGH

Hi all! Today I'm going to show you how to make Moon Dough, a no cook playdough, with two ingredients that you probably have lying around the house, corn starch and hair conditioner. This should be easy peasy but if you need help measuring or finding ingredients ask your mom or dad. It's probably a good idea to ask them permission to use the conditioner anyway! It might be the only one in your house!

This moon dough is easy and quick to make. It will only take you about 10 minutes and that's being generous. All right, enough small talk, lets get mixing.

Step 1: The first thing you need to do is find your ingredients, a medium sized bowl and a spoon. Then, wash your hands and dry them thoroughly.

Step 2: Next, measure out 1 cup of corn starch and a $\frac{1}{2}$ cup of conditioner (2:1 ratio for you adults out there). You can always double that if you want to make a bigger batch. *Keep in mind, it takes more conditioner than you would think.

Step 3: Dump ingredients together in a medium sized bowl.

Mix the ingredients together with a spoon until the corn starch and conditioner start to stick together in clumps.

Step 4: Once the mixture is clumpy, you can dump it out onto a clean, hard surface and begin kneading the mixture with your hands. The mixture will stick to your hands a little bit and that's okay! The more you fold it together and push it around the less sticky it will become. If it is still too sticky, you can add a little bit of corn starch to get it to the right consistency.

Once you have kneaded the dough enough you should get something that looks like the picture below:

Last step: Once you've achieved the desired result, make sure you clean up your mess. Then, have a great time and enjoy your moon dough!

Moon Dough Recipe

Ingredients

- 1 C Corn Starch
- ½ C Hair Conditioner
- Food Coloring (optional)

Instructions

1. Measure out corn starch and conditioner and place in medium sized bowl
2. Mix the corn starch and conditioner together with a spoon until it starts to stick together
3. Dump the mixture on a clean solid surface and continue mixing with your hands until it is completely stuck together
4. If it is too sticky you can add a little more cornstarch until it is the right consistency
5. The moon dough will eventually begin to dry out. You can add a little more conditioner to make it soft again or just make a new batch. It's up to you!
